Georgia Institute of Technology   Atlanta, GA
Graduate Teaching Assistant   Jan 2021 - Present

- Graduate Teaching Assistant/Grader

SKILLS

Programming Languages:	JavaScript, ReactJS, Java, TypeScript, Python, Angular, HTML, CSS, Go
Technologies:	Git, Jenkins, CI/CD, AWS, Cyber Security, Linux, Docker, UX/UI

PROJECTS

Vehicle Management System *React, JavaScript, NodeJS, Express, MySQL, TypeScript*
Built a car transaction CRUD application with customer specific interface, manager specific interface, user authentication, and built REST APIs for MySQL database queries.

Video Management System *Java, MySQL, Spring Boot, Docker, Maven, CSS*
https://youtu.be/mOXpUtgFeqI
Built a CRUD Video management system consisting of different groups of consumers, services and related concepts. Can update details about the groups and services in the application. Allows interactions between customers and services as needed. Can archive and display reports about how the services have been used and how costs have incurred throughout the selected dates

Learning Management System *JavaScript, ReactJS, MongoDB, Express, NodeJS*
https://youtu.be/MKxjYUTmrLQ
Built a CRUD learning management system using a three tier architecture stack, which consists of MongoDB, ExpressJS & NodeJS, and also ReactJS. User can be an educator or a student and view the courses available on the web application.
